"Gets the Best."

DISSENSIONS IN
FRENCH CABINET

Delcasse Resignation Not Invoked Because of Ill Health—Letter Gives Reason.

HAS PROFOUND EFFECT

Writers Blame Foreign Minister for Failure of Balkan Policy and Shifting of Responsibility.

Paris, Oct. 14, 6:05 a. m.—Theophile Delcasse, the foreign minister, who retired yesterday, in his letter of resignation, did not invoke poor health as the reason for leaving the cabinet, but rather dissensions between himself and other ministers in regard to French foreign policy, says the Radical. This letter which Premier Viviani refused yesterday to read to the chamber of deputies, recalls certain facts, discussion of which the censor forbids.

The resignation of M. Delcasse has produced a profound effect upon the French public, although it has been known for some time there was friction between him and the rest of the cabinet. The press generally abstained from comment but what little is said is hostile to the retiring minister.

Blamed for Balkan Policy. Writers blame him for the failure of the Balkan policy and charge that he is trying to shift the burden of responsibility upon his former colleagues instead of trying to find a remedy for mistakes. His illness is regarded as of a diplomatic character.

Georges Clemenceau, who all along has attacked the French foreign policy, declares: "Viviani refused to read the letter in which his colleague resigned. All he can say is that Delcasse is in full agreement with him. It is the first time a minister has resigned his post because of the absence of a disagreement."

KEEL OF GREAT
BATTLESHIP LAID

High Naval Officials Attend Ceremonies Over First Electrically Driven Dreadnought in World.

SYSTEM WELL TESTED

New California Can Be Started Stopped, Backed and Manuevered by One Man on Bridge.

New York, Oct. 14.—An innovation in naval construction was inaugurated at the New York navy yard today with the laying of the keel of the superdreadnought California, the first battleship in the world to be equipped with electric machinery for her own propulsion. High officials of the navy department came here to attend the ceremonies and a luncheon given by Rear Admiral Usher, commandant of the yard.

The California will cost about \$15,000,000 and will displace 32,000 tons. She will carry twelve 14-inch rifles mounted in four 3-gun turrets. The two other battleships of this class will be the Idaho and the Mississippi, work on which has not yet been commenced.

The California's electric driving system has been tested by the use of a similar method on board the collier Jupiter. She can be started, stopped, backed and manuevered by one man from the bridge. Navy officers expect she will be completed in 1917.

FASHION SHOW BABES
WRIGHTS TOMORROW

A Review of the Prize Winning Babies Will Be Held Tomorrow Afternoon.

Would you like to see all of the babies which were prize winners at the recent baby exhibit of the Fashion Show? Would you like to have an opportunity to see them all together and know of which prize each was the winner? That will be a possibility tomorrow afternoon at Wright's store. So many people have expressed a desire to see the prize babies that we have arranged for most of them to be here.

As a souvenir of the occasion each little prize winner will receive a silver baby spoon with the year 1915 engraved on the handle.

The babies are to be here at 2 o'clock and the public will be admitted at 2:30. Be prompt, for the little tots cannot be kept waiting very long.

An additional feature of the day will be the exhibition and sale of things for babies—every article of apparel.

Thousands of fresh cut roses have been ordered and will be given to the mothers of the babies and to all other women who visit the store tomorrow.

Tomorrow will be a gala day at the big store—don't miss it.

BITTER FIGHT ON
GERMAN LINES

Intense Bombardment of Twenty Hours Precedes French Attack Which Began Monday.

Berlin, Oct. 14, via London, 11:55 a. m.—Correspondents of Berlin report that the fight on Monday in the districts around Loos and Souchez was most bitter. An intense bombardment of twenty hours preceded the French attack which began Monday morning. It was directed against the hill near Vimy, as well as against the German positions further north between Loos and Givency.

The particular object of the French onslaught was the elevation to the west of Vimy, which commands the flat land of Lens. The artillery battle was of such intensity that the guns could not be touched with the bare hand.

The French penetrated the German trenches in only one small section where the defenders and their guns had been buried by the French artillery fire. Bavarian troops threw out the French using knives and hand grenades. The losses of the French are described as very severe.

FRENCH WOMEN
MAKING SHELLS

Great Works Near Paris Equipped With American Tools and Old, Young and Middle Aged Working.

Quadruple Machine Tool From United States Greatly Facilitates Speed of Output.

Paris, Sept. 25.—(Correspondence of the Associated Press).—The unrelenting French artillery attack proceeding along the whole front is made possible by equally unrelenting and intensive effort in the production of projectiles in works which have been transformed by equipment with American machine tools and are working regularly twenty-four hours a day.

One of these great establishments near Paris, visited today by an Associated Press representative by official permission, makes more than five thousand shells and a number of aeroplane motors a day. The works visited produced six hundred automobiles annually before the war. The order of operations was different in shell making so it was necessary to shell place and re-arrange five thousand machines, install many new ones and at the same time find hands to replace a thousand mobilized mechanics.

Tremendous Task Accomplished. So formidable a task would have seemed before the war to be the work of a year, but it was accomplished in a few weeks and the works were ready to turn out daily thousands of parts of rifles and bayonets in addition to high power flying machine motors and shells.

Women, old, young and middle aged, are working there in the places of husbands, fathers, sons and brothers at the front. Projectiles and rifle parts are given the precision of a chronometer and every operation is supervised and the result verified before it goes on to the next hand.

Shells Stand High Pressure. The finished shell must not only stand a high hydraulic pressure, but it must give the proper ring. An expert in steel, isolated from the clang and medium size in a variety of attractive decorations, 50c. 29c. Some good books for the girls and boys—Boy Scouts, Fairview Boys, Motor Mails, Meade Series, Mathews Series; 50c. values. 29c.

Sewing Basket or Waste Basket, made of white enamel or mahogany finish wood frame, covered with dainty figured silk-lene; \$1.00 value. 58c.

Carpet Sweeper, steel body. \$1.29. Extra heavy cast aluminum Sauce Pan; removable black wood handle; \$2.00 value. \$1.48. Regular 40c. Broom, made of good quality broom corn, with smooth polished handle; medium weight. 24c.

Wright's
A GOOD PLACE TO TRADE
Tomorrow Is Baby Day

Tomorrow is Babies' Own Day. At 2:30 there will be as fine an exhibition of babies on our 2nd floor as one will see anywhere in the world, for nearly every baby which won a prize at the recent Fashion Show, will be here.

Every one of us would like to have seen the prize babies at the Fashion Show, but were not able to do so owing to the crowds.

Tomorrow you may see them all here together; the big babies, the small babies, the twin babies, the long-hair babies, and the bald babies and all the rest of this mighty interesting crowd. Come tomorrow afternoon; you'll enjoy this exhibition.

Free Roses for Lady Visitors

A pleasing feature of Baby Day will be the distribution of thousands of fresh cut roses to the lady visitors. These are for the mothers and for every other lady who visits the Baby Show.

The roses will probably be distributed on the 2nd Floor, where also the Babies will greet you.

New Things for Babies

This store strives to get the new and dainty things for the babies as well as for their mothers. Indeed, there's many a babe in Ogden who had its first dainty outfit from this store—had it complete from the first soft vest to the outer dress, and most of these wearables are made with as much care—made just as dainty—as the mother would make them who works love into every stitch.
